Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-25, drawn to a process of making a semiconductor device, classified in class 438, subclass 618.
 - II. Claim 1, drawn to a semiconductor device, classified in class 257, subclass 750+.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case The product as claimed can be made by a materially different process such as forming an interconnection layer without a SiC barrier layer; patterning the interconnection layer; conformally forming a silicon or carbon rich dielectric layer containing Si, C, and O ; forming a dielectric layer containing Si, C, and O with stoichiometric concentrations on the silicon or carbon rich dielectric layer.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, and separate examination would be required, restriction for examination purpose as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
